## OBJECTIVE

Backend-focused Full Stack Engineer with 4+ years of experience in Python, Node.js, DevOps, and AI/MCP integration, delivering scalable backend systems and AI-powered features across startups and enterprise projects.

## EDUCATION

**National Software Engineering Diploma**, ISSATso, Sousse, Tunisia 2019 - 2025  
Ranked 1st in major, 2021

**Exchange Year in Computer Science**, University of Wisconsin, Stout, USA 2022 - 2023  
UGrad Scholarship recipient for academic excellence; developed cross-cultural collaboration skills

## SKILLS

|                                   |                                                                                           |
|-----------------------------------|-------------------------------------------------------------------------------------------|
| <b>Languages &amp; Frameworks</b> | TypeScript, JavaScript, Next.js, React, Node.js, Python, Django                           |
| <b>Databases</b>                  | PostgreSQL, MongoDB, SQL                                                                  |
| <b>AI &amp; LLM Engineering</b>   | MCP Server development, AI Connector integrations, LLM integrations, AI coding assistants |
| <b>Cloud &amp; DevOps</b>         | Docker, Kubernetes, Azure, GitHub Actions, GitLab CI/CD, Git                              |
| <b>Spoken Languages</b>           | Arabic (Native), English (Proficient), French (Proficient), German (Beginner)             |

## EXPERIENCE

**AI & Backend Engineer** Feb 2026 – Present  
CI-HUB *Potsdam, Germany*

- Developed backend capabilities for an AI-powered MCP Server using TypeScript and Node.js.
- Built production-ready AI Connector features supporting enterprise integrations.

**Backend & DevOps Developer** Jul 2024 – Present  
C4SAM *Vienna, Austria*

- Developed scalable backend services using Django for production business applications.
- Optimized GitLab CI/CD pipelines, improving deployment reliability and release automation.
- Implemented AI-powered backend features to automate business workflows.

**Software & Data Engineering Intern** Feb 2025 – Jul 2025  
Dassault Systèmes *Paris, France*

- Developed an automated troubleshooting platform in Java and Python for large-scale production log analysis.
- Built Grafana dashboards and AI-based pattern recognition to accelerate incident investigation.

**Backend Developer** Aug 2022 – Apr 2024  
AstroLab Agency *Sousse, Tunisia*

- Developed RESTful APIs using Node.js, NestJS, and Express for a large-scale Qatari government project.
- Designed backend services using MongoDB and PostgreSQL for secure, scalable applications.

## EXTRA-CURRICULAR ACTIVITIES

- Gold Microsoft Learn Student Ambassador (MLSA)** – selected as part of a global community of campus leaders, mentoring students and driving tech community engagement.

## LEADERSHIP

- Co-founded Tunisia Dev Days, an event connecting tech enthusiasts across the country.
